

# HOW DO I FIND OUT MY DIOPTERS?

---

Print the scheme on an A4 sheet and put it in a reading position about 30 cm from the eyes.

Read line after line to find out the diopters to add to the lens of your Fassamano!

**+3.00**

Maybe not everyone knows...

The word *fassaman* came into use in Venice around 1700 to point a reading aid framed like a a mask.

**+2.00**

This reading glasses becomes an important accessory of the bourgeois while preserving French allure where it is called "*face à main*".

In 1302, the Giustizieri Vecchi, a sort of ruling body for the artesana in Venice granted permission to any artisan to manufacture some "*vitrei ab oculis ad legendum*" or "*glass rounds for the eyes to see*" or "*roidi del vero da oci*" in Venetian dialect.
